

Advancement of DBMS technologies in conjunction with the UNIX enterprise system technologies

- Mode of conduct

Author: Chandrashekar C. S

CEO, Techno Ascent Solutions Academy (TASA),

For more details, please visit www.tasa.io/<AUTHORS>

Mode of conducting this professional training course:

- This pro-training course was conducted a LIVE training program via Zoom and was formulated upon a request from a Head of Computer Science Department of an Engineering college, Hyderabad, India to assist the CS teaching staff.
- The Nano video & very 1st chapter of this training course includes a few online videos recorded files in MP4 format which has been published at www.tasa.io which are very well structured based on the proposed course Syllabus.
- Each of these video file(s) includes the Author's training class sessions & are supported by the PowerPoint (i.e. PPT) presentation slides.
- Each of these PPT slide(s) contains training course content in one of the following form(s):
 - Simple text format,
 - Diagram(s) and/or pictorial diagrams,
 - Flowcharts,
 - Company logo watermarks & copyright,
 - Images/objects/photos/pictures/graphics/Cartoons which are appropriate to context of content of that PPT slide/Chapter.
 - Questionnaires at the end of each chapter

Logistical prerequisites for viewing this training course HD MP4 formatted video(s):

- Student need to have a stable, high speed internet connection.
- Desktop or Laptop with recent Intel/AMD processor with minimum 2GB RAM
